LUPA Process:

Element I Land Use

Part 2: Plan Implementation

H) Plan Amendments

3. Required Land Use Plan Amendment Considerations

LUPA Process:

- 3.1 The availability of sanitary sewer service, or plans to expand or provide such service within a financially feasible capital plan, adopted by the City, shall be a primary consideration when amendments to the Land Use Plan for increased densities are intensities are proposed.
- 3.2 Prior to adopting and land use plan amendment, the City shall determine whether adequate public facilities and services will be available when needed to serve the amendment site.

LUPA Process:

3.3 The City shall determine the consistency of land use plan amendments with the Public School Facilities Element. The consistency finding shall address whether sufficient capacity is available, or anticipated within the short or long range planning horizon of the Element, to accommodate the projected student impact or proposed amendments. As provided for within the Amended Interlocal Agreement for Public Schools Facilities Planning (ILA), the School Board of Broward County shall advise the County and local governments regarding the projected student impact of amendments and the availability of capacity at impacted schools.

LUPA Process:

3.4 Amendments to the Land Use Plan containing golf courses, including closed golf courses, shall analyze and address the following impacts of golf course development:

- i. The impact of the loss of open space on the surrounding residential areas. The loss of open space must be mitigated through provision of parks and open space to serve the surrounding neighborhood.
- ii. Management of storm water retention taking into account the extent to which the golf course provided storm water retention for the surrounding development and how this will be mitigated, along with any additional storm water impacts created by the new development.

LUPA Process:

- iii. Minimization of the impact on natural resources including wetlands, lakes, aquifer recharge areas and the tree canopy, including any historic trees on site.
- iv. Mitigation of environmental contamination. The level of environmental contamination must be determined by conducting a Phase 1 environmental assessment. A Phase 2 environmental assessment may be required based upon the findings of the Phase 1 assessment.
- v. Integration of the proposed development with the surrounding areas including how the development will tie into the existing neighborhoods through roads, sidewalks, parks/open space and greenways.

LUPA Process:

- 3.5 Amendments that propose to add 100 or more residential dwelling units to the existing densities approved by Land Use Plan are subject to BCLUP Policy 2.16.2, which requires that the City and applicant coordinate and cooperate to implement the City's policies, methods and programs to achieve and/or maintain a sufficient supply of affordable housing.
- 3.6 The City shall consider the impacts of land use plan amendments on wetland resources and minimize those impacts to the maximum extent practicable.
- 3.7 The impacts of land use plan amendments on historic, archeological and paleontological resources shall be considered in the approval process.

Rezone Process:

Sec. 40.303 ULDC

(A) Procedure ➡ Determination that services are available

(B) Planning and Zoning Board Review ➡ Criteria

(C) City Commission Review ➡ Final Determination

Sec. 40.303 ULDC Criteria:

- a) The proposed change is contrary to the adopted comprehensive plan, as amended, or any element or portion thereof;*
- b) The proposed change would create an isolated zoning district unrelated and incompatible with adjacent and nearby districts;*
- c) Existing zoning district boundaries are illogically drawn in relation to existing conditions on the property proposed for change;*
- d) The proposed change will adversely affect living conditions in the neighborhood;*

Sec. 40.303 ULDC Criteria:

- e) The proposed change will create or excessively increase automobile and vehicular traffic congestion, above that which would be anticipated with permitted intensities or densities of the underlying land use plan designation, or otherwise affect public safety;*
- f) The proposed change will adversely affect other property values;*
- g) The proposed change will be a deterrent to the improvement or development of other property in accordance with existing regulations;*
- h) The proposed change will constitute a grant of special privilege to an individual owner as contrasted with the welfare of the general public;*

Sec. 40.303 ULDC Criteria:

- i. There are substantial reasons why the property cannot be used in accord with existing zoning;*
- j. The proposed zoning designation is the most appropriate designation to enhance the City's tax base given the site location relative to the pattern of land use designations established on the future land use plan map, appropriate land use planning practice, and comprehensive plan policies directing land use location.*
