

Laerdal Advanced Airway Solution (LAAS)

By: LAERDAL MEDICAL CORPORATION

This item is currently only available for pre-order.

The Laerdal Advanced Airway Solution is a fully equipped training platform for contaminated, basic and difficult airway management, and CPR practice. Designed for engaging individual and team training, it delivers realism, real-time feedback, and fast setup and cleanup. With adjustable airway complexity, it supports progressive learning by adapting to each learner's skill level and training goals.

Contaminated Airway Training

Replicate the chaos of a real contaminated airway and train to manage it effectively with the Suction-Assisted Laryngoscopic Airway Decontamination (SALAD) technique.

Airway Management Training
