

Solution is a fully equipped training platform for contaminated, basic and difficult airway management, and CPR practice. Designed for engaging individual and team training, it delivers realism, real-time feedback, and fast setup and cleanup. With adjustable airway complexity, it supports progressive learning by adapting to each learner's skill level and training goals.

Train for skills that matter The Laerdal Advanced Airway Solution is a complete training solution designed to help learners practice everything from basic ventilation to advanced suction techniques, airway decontamination, and team-based resuscitation.
