CORWORTH MANAGEMENT SYSTEM

The CorWorth Management System (CMS) is a web based Multiprotocol Building Automation and Management Platform integrated with cellular technology that provides Supervisory Control And Data Acquisition (SCADA) capabilities for your park restroom buildings. The CMS is a scalable system that provides real time information and programmable control over door locks, door openers, lighting, water management, freeze protection and other building systems. Machine-to-machine communication reduces manpower requirements and scheduling issues while helping to reduce vandalism and protect your restroom buildings. Call for custom capability information.
