Subject: New Activity Pool Concrete Collector Tank  
Job Location: Calypso Cove 6200 Royal Palm Blvd.  
Margate, FL

### **PROPOSAL:**

As per your request to replace the Activity Pool Collector tank, Sammet Pools, Inc. hereby proposes the following:

- Remove the existing fiberglass collector tank for the Activity pool and haul away.
- Excavate approximately 2' around the old collector tank in order to form new tank.
- Compact ground properly to ensure no future settling. Install approx. 6" of 57 rock.
- Form, steel, and pour new concrete collector tank using existing plumbing. New tank will be a minimum of 2,300 gallons.
- Install water stops over the existing plumbing that penetrates through the new concrete collector tank walls.
- New concrete collector tank will be poured in place over existing plumbing.
- We will thoroughly waterproof the collector tank with Basecrete waterproofing system.
- New collector tank will have new slide valves for gutter and main drain.
- Half of the new concrete collector tank will have a concrete roof that will cover half of the tank. The other half will be a new custom top with 2" X 2" X2" fiber grating and which will double for the access collector tank.
- Install new auto fill and attached to existing overflow. The new collector tank will be slightly bigger and will come out of the ground approximately 12" above grade.
- This proposal includes the necessary permits for HRS modification and City permits if needed.
