**RE: LANDSCAPE SERVICES
891 NORTH STATE ROAD 7
MARGATE, FLORIDA 33063**

Dear Rita:

Below please find results of landscape service quotes received for the subject property. I had the opportunity to speak with Executive Director and explain the MCRA's contracted landscape vendor, LSP, provided a quote and revised quote for this service. With what was perceived as an exuberant cost, additional bids were requested from M & M Lawn and Complete Outdoor Service.

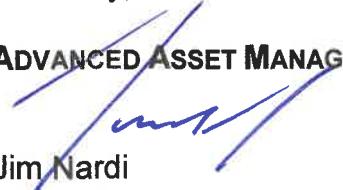

| | | |
|------------------|------------------------------|---------------------------------|
| M & M Lawn Care | (\$160.00 per cut) | \$1,920 |
| Complete Outdoor | (verbal quote \$180 per cut) | \$2,160 annual |
| LSP | (\$300.00 per cut) | \$3,600, plus \$650 initial cut |

 The Executive Director approved moving forward with M & M Lawn Care for the needed service.

If you wish to discuss this any further please contact me at (954) 817-1041.

Sincerely,

ADVANCED ASSET MANAGEMENT, INC.

Jim Nardi

3.2 MOWING SPECIFICS:

(a) Mowing shall be performed in a manner consistent with landscape maintenance industry standards that ensures smooth surface appearance without scalping or leaving any uncut grass.

(b) All mowing equipment must be equipped with adjustable and functional discharge chutes. Discharge chutes shall be angled downward as necessary to prevent the discharge of clippings or other generated debris into pedestrian areas, roadways, or other areas that may cause damage or injury to persons or property. Discharge chutes shall be adjusted downward at a minimum 35 degree angle from horizontal when conducting mowing operations along medians and roadway edges.

(c) All mowers must be adjustable and adjusted to the proper cutting height and level for the kind of grass and current condition of the turf. Mower blade height adjustment is to be measured from a level floor surface to the parallel and level plane of the mower blade.

(d) All mower blades are to be sharp enough to cut, rather than to tear grass blades.

(e) All litter and debris is to be removed from turf before mowing to avoid shredding that will damage turf appearance, or items that may be propelled by mower blades.

(f) Mowing will be done carefully so as not to damage tree bark, tree supports or shrubs, intrude into ground cover beds, damage sodded berms, sprinkler heads, valves, manifolds, time clocks, curbs, or other items within or adjacent to the maintenance area.

(g) Grass clippings or debris caused by mowing or trimming shall be removed from adjacent walks, streets, drives, gutters, and curbs or surfaces on the same day as mowed or trimmed. Nothing shall be allowed to stay in the vicinity of a stormwater inlet/catch basin(s) nor be allowed to enter into any inlet, catch basin or body of water. Grass clippings, leaves or any other debris shall be removed and not blown towards the road. Failure to follow these requirements may result in termination of the Agreement.

(h) Mowing will not be done when weather or conditions will result in damaged turf or uneven cutting.

(i) Grass shall not be mowed lower than two (2) inches in height. Cut heights are recommended to be set to NOT remove more than one-third (1/3) of the blade height, with an average maintained height of three (3) to four (4) inches.

(j) Excess clippings shall be spread out or removed as appropriate from right-of-way turf areas when they cause an unsightly appearance as determined by the MCRA or may restrict the regeneration of the turf below. Under no circumstances are excess clippings to be placed on, near or in a catch basin or water body.

3.3 MOWING FREQUENCIES:

(a) Grass shall be mowed between 27 cuts to 41 cuts annually as indicated below:

| Map Areas | Mowing Frequency |
|---------------|---|
| 1 through 6 | Should be mowed every 10 days for the months of April – October and every 21 days the months of November – March. Not to exceed 27 cuts per year. |
| 13 through 15 | |
| 17 through 18 | |
