## CITY OF MARGATE - SR 7 TRANSIT ORIENTED CORRIDOR #15-01

### 1. TRANSMITTAL INFORMATION

- A. Letter of transmittal from municipal mayor or manager documenting that the local government took action by motion, resolution or ordinance to transmit a proposed amendment to the Broward County Land Use Plan. Please attach a copy of the referenced motion, resolution or ordinance. The local government's action to transmit must include a recommendation of approval, denial or modification regarding the proposed amendment to the Broward County Land Use Plan.

*To be provided.*

- B. Date local governing body held transmittal public hearing.

*To be provided.*

- C. Whether the amendment area is within an Area of Critical State Concern or proposed for adoption under a joint planning agreement pursuant to Section 163.3171, Florida Statutes.

The amendment area is *not* within an Area of Critical State Concern or proposed for adoption under a joint planning agreement pursuant to Section 163.3171, Florida Statutes.

- D. Whether the amendment is one of the following:

\*Development of Regional Impact

\*Small scale development activity (Per Florida Statutes)

\*Emergency (please describe on separate page)

\*Other amendments which may be submitted without regard to Florida statutory limits regarding amendment submittals (Brownfield amendments, etc.)

The amendment is not related to any of the above specifications.

### 2. LOCAL GOVERNMENT INFORMATION

- A. Local land use plan amendment or case numbers.

The Local Land Use Plan amendment number is 15-\_\_ and the City's identification number for the proposed County amendment for this site is 15 -\_\_.

- B. Proposed month of adoption of local land use plan amendment.

The proposed month of adoption by the City of Margate is \_\_\_\_\_.

The estimated month of adoption by the County Commission is \_\_\_\_\_.

- C. Name, title, address, telephone, facsimile number and e-mail of the local government contact.

Benjamin J. Ziskal, AICP, CEcD

- D. Summary minutes from the local planning agency and local government public hearing of the transmittal of the Broward County Land Use Plan amendment.

The City of Margate Planning & Zoning Board minutes are included in Attachment 1. The City Commission ordinance transmitting the proposed amendment and proposed policies are included in Attachment 2.

- E. Description of public notification procedures followed for the amendment by the local government.

Large scale amendment public notification procedures are being followed.

The proposed amendment was noticed in the Sun-Sentinel ten days prior to the Planning & Zoning Board public hearing and ten days prior to the City Commission public hearing. The Sun-Sentinel notice is included in Attachment 3.

### **3. APPLICANT INFORMATION**

- A. Name, Title, Address, Telephone, E-Mail, and Facsimile Number of the Applicant.

**Benjamin J. Ziskal, AICP, CEcD**

- B. Name, Title, Address, Telephone, E-Mail, and Facsimile Number of the Agent.

The City staff is acting as agent and Applicant for this amendment.

- C. Name, Title, Address, Telephone, E-Mail, and Facsimile Number of the Owner.

The TOC has multiple owners that will be informed throughout the process, however, this is a City-initiated amendment.

- D. Planning Council Fee For Processing The Amendment In Accordance With The Attached Exhibit C, "Fee Schedule For Amendments To The Broward County Land Use Plan and Local Land Use Element.

The required fee of \$12,146 has been submitted.

- E. Applicant's rationale for the amendment. The Planning Council staff requests a condensed version for inclusion in the staff report (about two paragraphs).

The original Margate SR 7 TOC was approved in 2007. At the time, school capacity shortages forced the City to reduce the residential entitlements being requested in the District by 1,151 units. In addition to that loss of units, after approval of the TOC it was discovered that existing

condominiums had been accounted for as nonresidential square footage. This resulted in an over-estimation of existing commercial square footage and an under-estimation of the count of residential units already built in the TOC by 1,139 units. The correction of this error left only 710 units available in the basket-of-rights within the TOC. To date, 107 units have been committed leaving 603 left for development. The Margate CRA is has accepted a proposal for development of the City Center area which, at buildout, will exceed the 603 units available in the TOC.

Given the previous error in the existing land use mix and the fact that the schools in Margate no longer have capacity issues, the City is requesting the correction in the 2007 land use mix which will reduce the square footage of commercial development and add the 1,139 condo units back into the TOC basket-of-rights. The correction of the 2007 basket of rights will not increase the net new development permitted within the TOC over what was intended and approved in 2007.

#### **4. AMENDMENT SITE DESCRIPTION**

- A. Concise written description of the general boundaries and gross acreage (as defined by the BCLUP) of the proposed amendment.

The proposed amendment is a text change only to correct the land use mix and increase the number of residential units for the Margate 441 TOC by the 1,139 units previously misclassified. That said, the gross acreage of the Margate 441 TOC is approximately 1,184.3 acres. The amendment area generally incorporates all parcels fronting State Road 7 within the City of Margate between Sample Road/City Limits to the north and Forest Boulevard/City Limits to the south, Banks Road to the east and Cocomar Canal to the west. A legal description is included in Attachment 4.

- B. Sealed survey, including legal description of the area proposed to be amended.

The proposed amendment is not a map change. It is a text change to correct the nonresidential square footage and the number of residential units previously requested in the original TOC amendment application. Given that no boundary changes are being made, a survey is not necessary for this amendment application.

- C. Map at a scale of 1"=300' clearly indicating the amendment's location, boundaries and proposed land uses. (Other scales may be accepted at the discretion of the Planning Council Executive Director.)

As previously noted, this application is not for a change to the land use map, however, the project location map showing the Margate 441 TOC area associated with this amendment application is provided in Attachment 5.

#### **5. EXISTING AND PROPOSED USES**

- A. Current and proposed local and Broward County Land Use Plan designations for the amendment site. If multiple designations, describe acreage within each designation.

The area is designated TOC on both the County and City land use maps. No map change is being requested in the amendment. The intent is only to correct the original nonresidential square footage and the number of units requested in the basket-of-rights for use in the District.

**B. Current land use designations for the surrounding properties.**

The current land use designations for the surrounding properties are shown below and in Attachment 6. The north side of the area is adjacent to Sample Road with commercial uses in the Cities of Coral Springs and Coconut Creek abutting. To the south are commercial and residential uses within the City of North Lauderdale. The east side is surrounded by a mix of commercial, industrial and residential uses. The uses to the west are primarily residential uses.

<b>Location</b>	<b>Current Land Use</b>
Amendment area	Commercial/Residential/Office/Industrial
North	Commercial/Residential
East	Commercial/Industrial/Residential
South	Commercial
West	Residential

**C. Indicate if the flexibility provisions of the Broward County Land Use Plan have been used to rezone adjacent areas.**

The subject site falls within Flexibility Zones 35 and 36. Flexibility provisions have not been used to rezone adjacent areas since the 2007 amendment.

**D. Existing use of the amendment site and adjacent areas.**

The existing land uses of the amendment site and adjacent areas are shown below:

<b>Location</b>	<b>Existing Land Use Designations</b>
TOC Amendment area	TOC Basket-of-Rights: 3,565 dwelling units 4,454,894 SF Commercial 1,371,159 SF Office 1,830,884 SF Industrial 555 Hotel Rooms 35 acres (min) Recreation and Open Space
North	Commercial/Industrial/Residential/ Vacant
East	Commercial/Industrial/ Residential
South	Commercial/Industrial/Vacant
West	Residential

**E. Proposed use of the amendment site, including proposed square footage for each nonresidential use and/or dwelling unit count. For RAC, LAC, TOC, TOD and MUR amendments, please provide each existing non-residential use square footage and existing dwelling units for amendment area.**

The original LUPA application for the Margate TOC assumed that only 1,716 residential units were built within the TOC area. The actual number of built units in the TOC was 2,855 units (another 107 net new units is approved on the NEWTH Plat 176-36 but is not yet built). This 1,139 unit under-estimate of the existing units in combination with the 1,151 units that the City had to eliminate from the TOC basket-of-rights due to school overcrowding in 2007, has resulted in a shortage of available units in the Margate 441 TOC. The purpose of this amendment, therefore, is to correct the record as to the nonresidential square footage and units built within the TOC as of 2007 and adjust the basket of rights while keeping the available balance for net new development constant.

The 2007 TOC future land use designation allowed a maximum of an additional 1,849 dwelling units; 350,000 square feet of commercial; 500,000 square feet of industrial space; 850,000 square feet of office; and 500 hotel rooms. This amendment will maintain that total net new development while correcting the fact that condominiums were miscoded as Commercial and Office space and 50,882 square feet of Industrial space was miscoded as Commercial Space. The above tables explain the difference between the 2007 TOC land use mix and the corrected 2007 land use mix. It should be noted that the projects approved since 2007 have not been accounted for above because it is the intent of this amendment to correct the 2007 basket of rights and all subsequent development will be subtracted from the corrected basket of rights. Exhibit "A" of the proposed City ordinance, provided in Attachment 2, contains the revised Margate Future Land Use Element policies 4.18 and 13.2 that reflect the above correction in the 2007 basket of rights.

- F. Maximum allowable development per local government land development regulations under existing Broward County Land Use Plan designations for the site, including square footage and/or dwelling unit count.

The basket of rights in the Broward County TOC land use designation for the Margate TOC is identical to the adopted City's TOC. The tables in response to 5.E above provide details regarding the corrections to the 2007 Application. The existing amount of development currently approved in the Broward County Future Land Use Plan and the net effect of the proposed amendment to correct the 2007 Application is summarized below.

Use	Approved TOC Basket of Rights	Proposed TOC Basket of Rights	Net Change in Basket of Rights
Commercial	4,454,894	3,432,992	-1,021,902
Office	1,371,159	1,355,280	-15,879
Industrial	1,830,884	1,881,766	50,882
Residential	3,565	4,704	1,139
Hotel	555	555	0
Rec. and Open Space	35 ac. Minimum	35 ac. Minimum	0

As stated in the response to 5.E, no change in the net new development results from this correction. The 1,139 condo unit buildings were previously coded as commercial and office, and 50,882 SF of industrial development was coded as commercial. These mistakes resulted in the net reduction in nonresidential square feet by -986,899 and the increase in total built residential units by 1,139.

## **6. ANALYSIS OF PUBLIC FACILITIES AND SERVICES**

The items below must be addressed to determine the impact of an amendment on existing and planned public facilities and services. Provide calculations for each public facility and/or service.

### **A. Sanitary Sewer Analysis**

#### **1) Identify whether the site is currently and/or proposed to be serviced by septic tanks.**

The amendment area is serviced by the City of Margate sewer system.

**2) Identify the sanitary sewer facilities serving the service area in which the amendment is located including the current plant capacity, current and committed demand on plant capacity, and committed plant capacity.**

The amendment area is served by the City of Margate's Wastewater Treatment Plant.

<i>Current Plant Capacity – Average Annual Daily Flow</i>	<i>8.78 mgd</i>
<i>Current Plant Capacity – 3- month average</i>	<i>10.1 mgd</i>
<i>Additional Planned Plant Capacity</i>	<i>0 mgd</i>
<i>Current Demand – Average Annual Daily Flow</i>	<i>6.640 mgd</i>
<i>Current Demand – Max. 3-month average flow</i>	<i>7.382 mgd</i>
<i>Committed Flows – Average Annual Daily Flow</i>	<i>0.185 mgd</i>
<i>Committed Plant Capacity- Average Annual Daily Flow</i>	<i>78%</i>

*Source: Margate Utilities, for current demands in 2014 and Broward County for Committed Flows from January 2015-July 2015*

Since 2007, the three month average inflow at the water treatment plant has gone down due to the leak detection and repair program that the City has implemented. The reduction in inflow is a direct result of the upgrades to the wastewater collection system.

The Broward County Population Projection for Year 2025 for Margate's Sewer Service Area (Margate plus a portion of Coconut Creek) has also gone down since 2007, from 67,589 to 60,384, an 11% decrease. The South Florida Water Management District 2025 population projection for the Margate Service Area is 62,521 which is a 7.5% decrease. Based on this range, the 2025 projected annual average daily (AADF) and three month average daily flows (TMADF) are anticipated to be between 7.4-7.66 mgd and between 8.51 and 8.81 mgd, respectively. The City of Margate permitted plant capacities are 8.780 mgd (AADF) and 10.1 mgd (TMADF). The plant capacity, therefore, has adequate capacity to accommodate these 2025 population projections.

The methodology used by Broward County for population projections considers redevelopment in the City as a significant factor for population growth, including the redevelopment anticipated from this land use plan amendment. The projected sewer service area population growth between 2015 (population 54,163) and 2025 (population 60,384) is 6,221 people. The 1,849 additional units within the TOC are projected to add 4,030 people which is 65% of the projected population growth for the Margate service area. The growth projections allow for residential buildout of the TOC while assuming 35% of the growth will occur outside the TOC.

Since the projected flows through the Year 2025 are within the current plant capacity, no plant capacity expansions are planned at the current time. The development in the city will be monitored and restricted, however, if growth requires capacity increases before 2025. This amendment application restricts development of residential units in the TOC to 1,849 before plant capacity issues are addressed. This restriction is identified as Policy 13.3 of Exhibit A of the City Commission Amendment Ordinance, provided as Attachment 2 to this application.

- 3) Identify the change in demand on plant capacity resulting from this amendment. Provide calculations, including anticipated demand per square foot\* or dwelling units.**

The proposed amendment does not change the net new development potential in the TOC. The sewer demand calculations provided in 2007 are still valid, however, the City's adopted sewer generation rate for multifamily units per Policy 2.2.2 of the Wastewater Subelement was applied for this update rather than the 136 gpcpd standard applied to the residential units in 2007.

<b>Future Land Use</b>	<b>Methodology</b>	<b>Demand</b>
Office	850,000 sf. @ 0.2 gpd/sf	+170,000 gpd
Industrial	500,000 sf. @ 0.15 gpd/sf	+75,000 gpd
Commercial	350,000 sf. @ 0.1 gpd/sf	+35,000 gpd
Hotel	500 rooms @ 150 gpd/room	+75,000 gpd
Residential @1,849 MF units	1,849 units x 250 gpd per unit	+462,250 gpd
Total 2015: + 817,250 gpd		

- 4) Identify the projected plant capacity and demand for the short and long range planning horizons as identified within the adopted comprehensive plan. Provide demand projections and information regarding planned capacity expansions including year, identified funding sources and other relevant information.**

In 2014, the City of Margate's Wastewater Plants operated at a maximum 3-month average daily flow of 7.382 mgd. The current plant capacity is 10.1 mgd. The .817 mgd AADF anticipated from the proposed amendments, which roughly equates to .945 mgd of 3-month average daily flows, would be within the current permitted plant capacity of 10.1 mgd. Prior to more than 1,849 units being constructed, the City may require upgrades to the plant to accommodate additional flow per Policy 13.3 in the City's adopted Future Land Use Element.

- 5) Correspondence from sanitary sewer provider verifying the information submitted as part of the application on items 1-4 above. Correspondence must contain name, position and contact information of party providing verification.**

The letter from Margate Utilities is provided in Exhibit A.

## **B. Potable Water Analysis**

- 1) Data and analysis demonstrating that a sufficient supply of potable water and related infrastructure will be available to serve the proposed amendment site through the long-term planning horizon, including the nature, timing and size of the proposed water supply and related infrastructure improvements.**

The data and analysis is provided in the responses below. The analysis shows the City will need additional potable water capacity to serve the full buildout of the net new development that has been established in the TOC basket of rights since 2007. The City will monitor the potable water supply and will take appropriate action to ensure no new development is approved unless the water supply is adequate to serve the new construction.

- 2) Identify the facilities serving the service area in which the amendment is located including the current plant capacity, current and committed demand on the plant and the South Florida Water Management District (SFWMD) permitted withdrawal.**

<b>Margate Water Treatment Facilities</b>	<b>Capacity/Demand</b>
Plant capacity	13.5 mgd
SFWMD permitted raw water withdrawal	
Annual thru 2025:	8.51mgd
Max Monthly thru 2025:	9.31 mgd
Current (2014) raw water demand AADD	7.61 mgd
Committed demand	0.185 mgd
Available water supply capacity	0.715 mgd
Proposed Amendment raw water demand (Finished water demand of 0.817 x 1.16)	0.948 mgd
Projected Capacity:	-0.233 mgd

As shown above, the City of Margate Water Treatment Plant capacity of 13.5 mgd is in excess of the projected demand. Therefore, no plant capacity increases are planned.

Current SFWMD permitted raw water withdrawals from the wellfield through the Year 2025, however, are 8.51 mgd (average) and 9.31 mgd (peak). As a result, the permitted withdrawal capacity is expected to be exceeded by full buildout of the TOC basket of rights. To address this potential shortage, alternative water supply projects may be implemented by the City to overcome the shortfall. The redevelopment anticipated as part of this amendment, will be monitored and restricted to ensure the permitted withdrawal capacity is not exceeded.

- 3) **Identify the wellfield serving the service area in which the amendment is located including the permitted capacity, committed capacity, remaining capacity and expiration date of the permit.**

The wellfield is located in the vicinity of the Margate Water Treatment Plant, 980 NW 66<sup>th</sup> Avenue.

<b>City of Margate Wellfield</b>	
Permitted raw water withdrawal capacity (Average)	8.51 mgd
Committed Capacity	7.795 mgd
Remaining Capacity	0.715 mgd
Permit expiration date	04-2025

- 4) **Identify the net impact on potable water demand based on adopted level of service resulting from this amendment. Provide calculations including anticipated demand per square foot or dwelling unit.**

<b>Future Land Use</b>		<b>Methodology</b>	<b>Demand</b>
Office		850,000 sf. @ 0.2 gpd/sf	+170,000 gpd
Industrial		500,000 sf. @ 0.15 gpd/sf	+75,000 gpd
Commercial		350,000 sf. @ 0.1 gpd/sf	+35,000 gpd
Hotel		500 rooms @ 150 gpd/room	+75,000 gpd
Residential MF units	1,849	1,849 units x 250 gpd per unit	462,250 gpd
Total 2015:			817,250 gpd 0.81725 mgd

- 5) **Identify the projected capacity and demand for the short and long range planning horizons as included within the adopted comprehensive plan - provide demand projections and information regarding planned plant capacity expansions including year, funding sources and other relevant information. If additional wellfields are planned, provide status including the status of any permit applications.**

As noted above, both the City of Margate Water Treatment Plant and wellfield have sufficient capacity to serve the amendment site and the expected population within the City of Margate's service area through the year 2025. Raw water supply will be the water-related challenge. Per the 2015 Water Supply Facilities Work Plan Objectives 1.1-1.3, the City is monitoring growth and is planning to add reuse capabilities to their wastewater treatment plant (when needed) or implement other Alternative Water Supply (AWS) projects intended to reduce water demand in order to accommodate full buildout in the TOC area and within the entire Margate water service area.

- 6) **Correspondence from potable water provider verifying the information submitted as part of the application on in items 1-5 above. Correspondence must contain name, position, and contact information of party providing verification.**

A letter from the City of Margate Utilities Department is included in Exhibit A.

### **C. Drainage Analysis**

- 1) **Provide the adopted level of service standard for the service area in which the amendment is located.**

The design capacity of the C-14 Primary Canal is limited by the South Florida Water Management District to:

Allowable Runoff.....69.2 csm  
Drainage Design Frequency.....25 year 3-day storm

The City's Comprehensive Plan Drainage Subelement contains the following levels of service :

Policy 3.2.1 By November 16, 1989 or when required by legislative mandate, land development regulations shall be adopted implementing the following minimum design criteria for water management as the level of service standards to asses adequacy of service during the development process.

#### **SUBJECT      ADOPTED LEVEL OF SERVICE STANDARD**

**Road Protection** - Residential streets not greater than fifty feet to have crown elevations no lower than the elevation for the respected area depicted on the ten year "Flood Criteria Map."

**Road Protection** - Rights-of-way greater than fifty feet wide to have an ultimate edge of pavement no lower than the elevation for the respective area depicted on ten- year "Flood Criteria Map".

**Buildings** - To have the lowest floor elevation no lower than the elevation for the respective area depicted in the "100 Year Flood Elevation Map."

**Off Site Discharge** - Not to exceed the inflow limit of SFWMD primary receiving canal or the local conveyance system, whichever is less.

**Storm Sewers** - Design frequency minimum to be three-year rainfall intensity off the State Department of Transportation Zone 10 Rainfall curves.

**Flood Plain Routing** - Calculated flood elevations based on the ten year and one hundred year return frequency rainfall of three day duration shall not exceed the corresponding elevations of the ten year "Flood Criteria Map" and the "100 Year Flood Elevation Map".

**Antecedent Water Level** - The higher elevation of either the control elevation or the elevation depicted on the map “Average Wet Season Water Levels.”

**On Site Storage** - Minimum capacity above antecedent water level and below flood plain routing elevations to be design rainfall volumes minus off site discharge occurring during design rainfall.

**Best Management Practices (BMP)** - Prior to discharge to surface or ground water, BMP’s will be used to reduce pollutant discharge.

These levels of service shall be used to determine adequacy at the time of plat and site plan approval for all properties within the City.

**2) Identify the drainage systems serving the service area in which the amendment is located.**

The C-14 canal bisects the subject site just south of Atlantic Boulevard. Runoff from area is routed through the local canal network prior to discharge into C-14 canal. No specific development is proposed at this time. New development will be required to provide adequate drainage systems to handle stormwater run-off.

**3) Identify any planned drainage improvements, including year, funding sources and other relevant information.**

No specific drainage improvements are proposed at this time. Future development will undergo drainage permitting prior to the issuance of building permits.

**4) Indicate if a Surface Water Management Plan has been approved by, or an application submitted to, the SFWMD and/or any independent drainage district, for the amendment site. Identify the permit number(s), or application number(s) if the project is pending, for the amendment site. If an amendment site is not required to obtain a SFWMD permit, provide documentation of same.**

No submittals have been made to the SFWMD at this time.

**5) If the area in which the amendment is located does not meet the adopted level of service and there are no improvements planned (by the unit of local government or drainage authority) to address the deficiencies, provide an engineering analysis which demonstrated how the site will be drained and the impact on the surrounding properties. The information should include the wet season water level for the amendment site, design storm elevation, natural and proposed land elevation, one hundred year flood elevation, acreage for proposed water management retention area, elevations for buildings, roads and years, storage and runoff calculations for the design storm and estimated time for flood waters to recede to the natural land elevation.**

New development will be required to provide adequate drainage systems to handle stormwater run-off. The new urbanist design principles being applied in the TOC

requires additional green space. Stormwater vaults will also be encouraged as a strategy to address stormwater.

- 6) Correspondence from the local drainage district serving the area in which the amendment is located verifying the information in items 1-5 above. Correspondence must contain name, position, and contact information of party providing verification.**

A letter from the Broward County Water Management Division/Cocomar Water Control District is included in Exhibit B.

#### **D. Solid Waste Analysis**

- 1) Provide the adopted level of service standard for the service area in which the amendment is located.**

The adopted LOS for solid waste is:

Industrial – 2 lbs. per 100 sq. ft. per day  
 Office - 1 lb. per 100 sq. ft. per day  
 Commercial – 5- 9 lbs. per 100 sq. ft. per day  
 Residential – 8.9 lbs. per capita per day.  
 Hotel – 5.43 lbs. per room per day.

- 2) Identify the facilities serving the service area in which the amendment is located including the landfill/plant capacity, current demand on landfill/plant capacity and committed landfill/plant capacity.**

The facilities that serve the subject area are the Broward County North and South Resource Recovery Facilities (NRRF) (SRRF) and the Broward County Interim Contingency Landfill (BIC). According to the Broward County 2009 Solid Waste Element update, the capacity of the NRRF and SRRF is 1.6 million tons per year. The BIC design capacity is 4.8 million tons. The current demand at the resource recovery facilities is 1.1 million tons per year and the demand at the BIC is 80,000 tons per year. The 2009 demand at the NRRF and SRRF is 1.1 million tons per year.

- 3) Identify the net impact on demand resulting from the proposed amendment. Provide calculations including anticipated demand per square foot or dwelling unit.**

The solid waste demand has not changed as a result of this correction to the TOC basket of rights because the net new development has not changed from the 2007 approval.

<b>Future Land Use</b>	<b>Methodology</b>	<b>Demand</b>
Non-Residential	1,700,000 sq. ft. @ 2 lbs. per 100 sq. ft per day	34,000 lbs.
Residential	1,849 dwelling units at 8.9 lbs. per unit per day	16,456_lbs.
		Total 2015: 50,456 lbs.

- 4) **Correspondence from service provider verifying the information in items 1-3 above. Correspondence must contain name, position, and contact information of party providing verification.**

A letter from the Broward County Waste and Recycling Services is included in Exhibit C.

#### **E. Recreation and Open Space Analysis**

- 1) **Provide the adopted level of service standard for the service area in which the amendment is located and the current level of service.**

The adopted level of service standard for Recreation and Open Space is 3 acres per 1,000 residents. The City currently has 205.1 acres of Park and Recreation lands and an estimated 53,765 residents which equates to 3.8 acres per 1,000 residents. The current park acreage exceeds the adopted LOS standard by 43.8 acres. This park acreage will accommodate an additional 14,600 people, therefore, there is sufficient capacity to meet the 3-acre per 1,000 LOS for the 4,030 additional people that will live in the 1,849 new units in the TOC at buildout.

The Broward County population projection for the City of Margate between 2015 and 2025 is only an additional 1,002 people (2015 – 53,765 and 2025 – 54,767) so the current park acreage can sustain both full buildout of the TOC and the 1,002 people expected per the Broward County population projection, which may or may not include the development in the TOC.

- 2) **Identify the parks serving the service area in which the amendment is located including acreage and facility type, e.g. neighborhood, community or regional park.**

The amendment area currently contains 31.964 gross acres of Parks and Recreation, including the following:

Andrews Field (Margate Middle School) 12.529 acres  
Coral Gate Park (City Park) 4.492 acres  
David Park (City Park) 6.901 acres  
Kaye Stevens Park (City Park) 3.721 acres  
Serino Park (City Park) 1.711 acres  
Parcel E of Margate Middle School (School site) 1.129 acres  
Canal S.E. of Lemon Tree Lake (Open Space)  
S.W. Corner of Lemon Tree Lake (Open Space) .209 acres

Policy 13.10 of the adopted Margate Future Land Use Element, provides that public plazas, urban open space or green space/pocket park uses that are accessible to the public shall be provided as an integrated component within the TOC.

All existing Parks and Recreational Space shall remain while implementing this amendment. In no case shall less than thirty five (35) acres be provided for Parks and Recreation Space. There are few open spaces in the amendment area but there is a

Community Center. The new development will be required to provide new green spaces by as much as 19 acres.

**3) Identify the net impact on demand for park acreage, as defined by the Broward County Land Use Plan, resulting from this amendment.**

Based upon an average household size of 2.18 persons per household, the proposed residential development is expected to generate approximately 4,030 additional people (10,255 total). This population generates a need for approximately 12.09 acres of recreational land. Based on the current adopted level of service standard a surplus of 31.7 acres will remain even if no additional park land is dedicated. The proposed redevelopment plan proposes to incorporate open space into the development; therefore, increasing available open space in the City. Currently there are 33.7 acres of Park and Open Space in the amendment area. At a minimum, this acreage will be maintained and through redevelopment, additional open spaces will be required.

**4) Identify the projected park needs for the short and long range planning horizons as identified within the adopted comprehensive plan - provide need projections and information regarding planned capacity expansions including year, identified funding sources, and other relevant information.**

Through the year 2025, the City will exceed its adopted level of service for parks. This amendment will increase this surplus by a minimum of 12.09 acres.

**F. Traffic Circulation Analysis**

**1) Identify the roadways impacted by the proposed amendment and indicate the number of lanes, current traffic volumes, adopted level of service and current level of service for each roadway.**

- 3) Planning Council staff will analyze traffic impacts resulting from the amendment. You may provide a traffic impact analysis for this amendment - calculate anticipated average daily traffic and p.m. peak hour traffic generation for the existing and proposed land use designations. If the amendment reflects a net increase in traffic generation, identify access points to/from the amendment site and provide a distribution of the additional traffic on the impacted roadway network and identify the resulting level of service change for the short (5-year) and long range planning horizons.**

The net new development for the current approved basket of rights is the same as it is for the corrected basket of rights proposed in this amendment so there is no change in the new traffic impacts as a result of this amendment.

There is a change in the total approved basket of rights compared to what the basket will contain when this amendment is adopted. The net change results in a reduction in PM Peak Hour traffic as shown below.

### Correction in Margate 441 TOC Basket of Rights

Land Use	Net Change in Max Development	PM Peak Hour Trip Generation Rate	Net Change in PM Peak Hour Trips
Industrial (110)	50,882 sq. ft.	0.97 per 1,000 sq. ft.	49.36
Office (710)	-15,879 sq. ft.	1.49 per 1,000 sq. ft.	-23.66
Commercial (820)	-1,045,829 sq. ft.	3.71 per 1,000 sq. ft.	-3,880
Hotel (310)	No change	N/A	0
Residential (230)	+1,139	0.52 per dwelling units	+592
			Total: -3,262.3
<b>Source:</b> <i>Trip Generation 9<sup>th</sup> Edition, Institute of Transportation Engineers</i> <i>Note: This trip generation does not take any trip capture from being a mixed use development into account which will very likely reduce vehicular trips from this project.</i>			

#### 4) Provide any transportation studies relating to this amendment, as desired.

The corrections to the basket of rights results in a projected trip reduction of 3,262.3 PM peak hour trips. This is a result of the fact that condo buildings were miscoded as commercial and office buildings which have a much higher trip generation rate than the 1,139 condos which have replaced that square footage. The actual increase in traffic over current conditions, however, will be the same with the proposed basket of rights because the net new development with the 2007 basket of rights and the corrected 2015 basket of rights is the same.

### G. Mass Transit Analysis

#### 1) Identify the mass transit modes, existing and planned mass transit routes and scheduled service (headway) serving the amendment area within one-quarter of a mile.

Since the 2007 TOC amendment was approved. Transit service and infrastructure to the area has been greatly enhanced. The Breeze, which is the express bus route on the previous Route 19 on SR 7 has been instituted since the 2007 amendment was approved. Routes 34, 42, 60 and 83 are conveniently linked by Miramar's Inner-City bus service, including Routes A, As, C and D. The schedules and routes of the inner city bus services are provided at the following link <http://www.margatefl.com/resident/transportation.html>. Headways are shown in the table below.

Route	Headway
SR 7 Breeze	20 minutes
BCt 19	20 minutes
BCt 34	15 minutes
BCt 42	30 minutes
BCt 60	30 minutes
BCt 62	40 minutes
BCt 83	30 minutes
Inner City A	60 minutes
Inner City AS	60 minutes
Inner City C	60 minutes
Inner City D	60 minutes
SFRTA	30 minutes

## 2) Quantify the change in mass transit demand resulting from this amendment.

The purpose of this amendment is to correct the basket of rights for the TOC which did not accurately reflect the amount of nonresidential square footage or residential units because the Condo buildings had been erroneously coded as Commercial and Office uses and the 1,139 existing condos had not been included in the built residential tally. This correction to the 2007 basket of rights does not change the net new development proposed in 2007 so no new impacts will result from this correction.

That said, the return of the 1,139 previously uncounted units to the basket of rights will enable the Town Center in Margate to be developed based on the concept shown in the Margate City Center Concept Plan below. The Margate CRA is under contract with New Urban Communities, Inc. to implement this plan. The addition of this compact community on the transit routes will certainly enhance ridership.

**3) Correspondence from transit provider verifying the information in items 1-2 above. Correspondence must contain name, position, and contact information of party providing verification.**

A letter from Broward County Transit (BCt) is included in Exhibit D.

**4) Describe how the proposed amendment furthers or supports mass transit use.**

As stated previously, this amendment is intended to correct the numbers in the basket of rights which were discovered to be in error due to the misclassification of condo buildings. The amendment, therefore, does not change the previous approval in relation to mass transit use.

It should be noted, however, that since 2007, the following actions have been taken to support mass transit riders within the Margate 441 TOC.

- Broward County Transit now operates The 441 Breeze express bus which connects riders in Palm Beach, Broward and Dade County.
- BCt Route 19 in Margate is in the top 5 of all routes in ridership as of July, 2015.
- The City has installed 15 enhanced bus shelters on SR 7.
- The City's shuttle bus routes and schedules have been improved.
- The City adopted a Form Based Code that requires transit oriented development and includes transit oriented uses and design, a build-to line, wider sidewalks, parking reductions, shared parking, bike parking and racks, among other things.
- The City amended the Broward County Trafficways Plan to reduce the ROW width of SR 7 in Margate from 200 to 150 feet to ensure a more pedestrian oriented section in the Margate TOC.
- The Broward MPO recently submitted an application for a TIGER grant for a regional complete streets initiative which includes the segment of Coconut Creek Parkway just east of the Margate SR 7 TOC.

**7. ANALYSIS OF NATURAL AND HISTORIC RESOURCES**

**Indicate if the site contains, is located adjacent to or has the potential to impact any of the natural and historic resource(s) listed below, and if so, how they will be protected or mitigated. Staff may request additional information from the Department of Planning and Environmental Protection and the Broward County Historical Commission regarding the amendment's impact on natural and historic resources. The applicant is encouraged to contact the individual review agencies to discuss these issues.**

**A. Historic sites or districts on the National Register of Historic Places or locally designated historic sites.**

No new historic sites or districts in Margate have been added to the "Broward County Land Use Plan Cultural Resource Map Series: Local Areas of Particular Concern – Historic Sites," since the 2007 amendment was approved. Therefore, there are still no known historic sites and no historic districts on the National Register of Historic Places on the subject site.

**B. Archaeological sites listed on the Florida Master Site File.**

No archaeological sites have been discovered on the subject site since the 2007 amendment which found there were no archaeological sites listed on the Florida Master Site File.

**C. Wetlands.**

Since the TOC amendment was approved in 2007, there have been no new wetlands mapped in Margate on the Broward County Wetlands Map. As of 2007, there was only one small portion of the amendment site that contained a Cypress Dominated Freshwater Swamp. The site is located south of Sample Road and east of State Road 7. No development is proposed for designated wetland areas. The remainder of the amendment area consists of existing developed parcels with no wetland areas.

**D. Local Areas of Particular Concern as identified within the Broward County Land Use Plan.**

Since the 2007 amendment was approved, no local areas of particular concern have been identified on the subject site.

**E. Priority Planning Area Map and Broward County Land Use Plan Policy A.03.05 regarding sea level rise.**

The Priority Planning Areas for Sea Level Rise Map does not identify any sites within Margate.

**F. “Endangered” or “threatened species” or “species of special concern” or “commercially exploited” as per the Florida Fish and Wildlife Conservation Commission (fauna), the U.S. Fish and Wildlife Service (flora and fauna), or the Florida Department of Agricultural and Consumer Services (fauna). If yes, identify the species and show the habitat location on a map.**

As was the case in 2007, the TOC area is almost fully developed and no known protected flora or fauna have been identified to date.

**G. Plants listed in the Regulated Plant Index for protection by the Florida Department of Agriculture and Consumer Services.**

As was the case in 2007, the TOC area is nearly fully developed and no known plants have been identified and listed in the Regulated Plant Index.

**H. Wellfields - indicate whether the amendment is located within a wellfield protection zone of influence as defined by Broward County Code, Chapter 27, Article 13 “Wellfield Protection.” If so, specify the affected zone and any provisions which will be made to protect the wellfield.**

According to the Broward County Wellfield Protection Zone Map, a portion of the City’s wellfield near Margate Boulevard is located within a wellfield protection zone. No uses or

hazardous materials will be allowed within the zone that will affect the protection of the wellfield.

**I. Soils - describe whether the amendment will require the alteration of soil conditions or topography. If so, describe what management practices will be used to protect or mitigate the area's natural features.**

It is expected the soils will be altered during construction to ensure the proper grading and creation of on-site stormwater retention facilities.

**J. Beach Access – Indicate if the amendment site fronts the ocean or would impact access to public beaches. If so, describe how public beach access will be addressed.**

No beach access is affected by development in Margate.

**8. AFFORDABLE HOUSING**

**Describe how the local government is addressing Broward County Land Use Plan Policy 1.07.07.**

The City's Future Land Use Element policy 13.3 governs affordable housing in the TOC. This policy requires a total of 15% of the residential units in the TOC be provided as affordable housing. The intent of the affordable housing policy is to ensure that those affordable units are integrated into a development proposal and not easily identified by location or design within the overall community. The City and the CRA have developed programs that promote the affordability of housing units. The land development regulations adopted for the TOC encourage new residential development within the TOC on reduced lot sizes, with reduced parking ratios and vertical integration of residential units with non-residential units.

**9. LAND USE COMPATIBILITY**

**Describe how the amendment is consistent with existing and planned future land uses in the area (including adjacent communities). Identify specific land development code provisions or other measures that have or will be utilized to ensure land use compatibility.**

Compatibility has been addressed through the City's form-based zoning code and with the criteria adopted as part of the Transit Oriented Corridor future land use category. The correction to the basket-of-rights proposed in this amendment will not create any additional compatibility issues.

**10. HURRICANE EVACUATION ANALYSIS**

**(Required for those land use plan amendments located in a hurricane Evacuation zone as identified by the Broward County Emergency Management Division.)**

The amendment is not located in a hurricane evacuation zone.

## **11. REDEVELOPMENT ANALYSIS**

**Indicate if the amendment is located in an identified Redevelopment (i.e. Community Redevelopment Agency, Community Development Block Grant) area. If so, describe how the amendment will facilitate redevelopment and promote approved redevelopment plans.**

The majority of the amendment area is located within the Margate Community Redevelopment Area. The impetus for this correction to the basket-of-rights within the Transit Oriented Corridor land use designation is the imminent redevelopment project for the City Center area within the CRA. The proposed project was in response to an RFP issued by the City and the CRA and the project plan is consistent with the CRA redevelopment plan for the City Center. At buildout, the project would exceed the remaining residential entitlements in the basket-of-rights if the totals are not corrected. This became the catalyst for the preparation of this amendment application.

## **12. INTERGOVERNMENTAL COORDINATION**

**Indicate whether the proposed amendment site is adjacent to other local governments.**

The amendment area abuts the City of Coconut Creek and City of Coral Springs to the north and the City of North Lauderdale to the south. The original master plan was created in partnership with adjacent local governments as part of the State Road 7/U.S. 441 Collaborative process to create a master redevelopment plan for the entire SR 7 corridor in Broward County. The proposed correction to the basket-of-rights does not affect the redevelopment concept and remains consistent with all adjacent jurisdictions.

## **13. CONSISTENCY WITH GOALS, OBJECTIVES AND POLICIES OF THE BROWARD COUNTY LAND USE PLAN**

**List of objectives and policies of the Broward County Land Use Plan which the proposed amendment furthers.**

This amendment is merely a correction in the land use mix that existed in 2007. The net new development potential is the same with this amendment as it was in the 2007 approval. No significant change in the consistency with Broward County Goals, Objectives and Policies will occur as a result of this amendment.

## **14. POPULATION PROJECTIONS**

### **A. Population projections for the 20 year planning horizon.**

The Broward County Traffic Analysis Zones and Municipal Forecasts Update, 2014 provides the following growth projections for the City of Margate:

2015	53,765
2020	54,597
2025	54,767
2030	54,985
2035	55,727

**B. Population projections resulting from proposed land use (if applicable).**

The Broward County population projection of 55,727 for 2035 assumes 1,962 additional residents, some of which may be occupying units in the TOC. A potential 4,030 residents could be accommodated on the amendment site by buildout of the TOC.

**C. Using population projections for the 20 year planning horizon, demonstrate the effect of the proposed amendment on the land needed to accommodate the projected population.**

Assuming all of this population increase is due to occupied new units at the current average household size and not by larger households in existing units, the 1,962 new residents by 2035 would require 900 additional units. New population will be accommodated through the conversion of non-residential land and land uses to residential or mixed-use development.

**15. ADDITIONAL SUPPORT DOCUMENTS**

**Other support documents or summary of support documents on which the proposed amendment is based.**

No additional support documents are provided at this time.

**16. PLAN AMENDMENT COPIES**

- A. 15 copies (minimum of 3 hard copies and the remainder may be digital copies) for the BCPC (please include additional copies if amendment site is adjacent to other municipalities or county jurisdictions). Additional copies may be requested by the Planning Council Executive Director after the initial application submittal.**

Eighteen copies (3-hard and 15 digital) of the amendment have been provided to the BCPC to accommodate the above request including the three adjacent local governments.

- B. 1 hard copy and 11 digital copies, as required by DEO, of the Corresponding Local Land Use Plan Amendment Application, if transmitting concurrent to DEO.**

One hard copy and 11 digital copies of the amendment have been provided for the DEO and reviewing agencies.

**PUBLIC EDUCATIONAL ANALYSIS**

Please be advised that the Planning Council staff will request from the Broward County School Board, as per policy 8.07.01 of the BCLUP, an analysis of the impacts of the amendment on public education facilities as indicated below. Please note that as per The School Board of Broward County, Florida, Policy 1161, amended and adopted January 15, 2008, the applicant will be subject to a fee for the review of the application. The applicant is encouraged to contact the School Board staff to discuss this review as soon as possible.

- 1. Identify the existing public elementary and secondary education facilities serving the area in which the amendment is located.**

The amendment area is currently served by Atlantic West, Margate and Liberty Elementary Schools; Margate Middle School; and Monarch, Coral Springs, and Coconut Creek High Schools.

2. **Identify the existing school enrollment and permanent design capacity of the public elementary and secondary education facilities serving the area.**

<b>Elementary School</b>	<b>2014/15 Twentieth Day Enrollment</b>	<b>2015/16 Projected Enrollment</b>	<b>Permanent Capacity</b>	<b>(Under)/Over Capacity</b>
Atlantic West	671	697	1,009	312
Margate	990	1,007	1,305	298
Liberty	1,027	1,057	1,282	225
Total	2,688	2,761	3,596	1,495
<b>Middle School</b>				
Margate	1,269	1,280	1,328	48
Total	1,269	1,280	1,328	48
<b>High School</b>				
Monarch	2,409	2,461	2,360	(101)
Coconut Creek	1,462	1,490	2,884	1,394
Coral Springs	2,609	2,651	3,244	593
Total	6,480	6,602	8,488	1,886

3. **Identify the additional student demand resulting from this amendment – calculations must be based on applicable student generation rates specified in the Broward County Land Development Code.**

The proposed amendment will correct the basket-of-rights established in 2007 to ensure the net new development of 1,849 dwelling units is established for growth in the TOC as intended in 2007. The 1,849 units is the same net new density that is currently permitted under the existing TOC land use designation.

The student generation rates in the Broward County Land Development Code are shown below. The Margate TOC zoning code limits heights to 6-8 stories depending on location within the district so no buildings built in the TOC will meet the definition of high-rise. Buildings may be built below 4 stories, however, so to be conservative, the student generation based on the Garden Apartment unit type is presented as a maximum projection and the Mid-Rise building type calculation is also presented as a minimum scenario.

**STUDENT GENERATION RATES PER BROWARD COUNTY LAND DEVELOPMENT

** Mobile home student generation rates based on 2008 study.					

Based on the 2 bedroom Garden Apartment unit type, the 1,849 units will generate a projected 251 elementary school students, 104 middle school students, and 82 high school students by buildout. If the midrise building type is assumed, which is the type of building envisioned in the TOC Zoning Code, the 1,849 units would generate only 53 elementary students, 24 middle schools students and 38 high school students.

- Identify the planned and/or funded improvements to serve the area in which the amendment is located as included within the school board's five year capital plan – provide student demand projections and information regarding planned permanent design capacities and other relevant information.**

According to the most recent District Educational Facilities Plan produced by the Broward County School Board (FY 2015-2016), all of the area schools will continue to meet their enrollment/capacity concurrency targets through FY 19/20 except for Monarch High School which is projected to be slightly over capacity in every year of the 5-year planning horizon in the DEFP. No capital improvements that will increase student enrollment capacity are planned for any of the schools, including Monarch High School.

- 5. Identify other public elementary and secondary school sites or alternatives (such as site improvements, nominal fee lease options, shared use of public space for school purposes etc.), not identified in Item #4 above, to serve the area in which the amendment is located.**

There is adequate capacity in the schools serving the TOC area to accommodate the students projected to be generated by the 1,849 new units which is the same net new development approved for the TOC in 2007.

Policy 13.2 Within the TOC land use category, the following mix of uses shall be included within the designated land. Commercial, Office, Industrial and Residential uses shall be the principal uses. In addition, the maximum intensity allowed within the TOC is as indicated below:

	Existing Built (SF/Units)	TOC Need (SF/Units)	TOC Max.
Commercial:	<del>4,104,894</del> <u>3,082,992</u>	350,000	<del>4,454,894</del> <u>3,432,992</u>

Residential:	<del>1,716</del> <u>2,855</u> units	<del>3,000</del> <u>1849</u> units.	<del>3,565</del> <u>4,704</u> units
Hotel:	55 rooms	500 rooms	555 rooms
Rec & Open	<del>35</del> <u>16</u> acres	<del>NA</del> <u>19</u> acres	<del>NA</del> <u>35</u> acres

Policy 13.3 Residential use is required as a principal component within a Transit Oriented Corridor. The location of residential uses shall be incorporated into a mixed use project or mixed use building with the location of residential uses consistent with those identified within the SR7/441 Corridor Master Plan. Exclusively residential buildings, not part of an overall mixed use project, shall be discouraged unless supporting commercial and office is within 1000’ linear feet. The TOC through implementing regulations or agreements shall ensure that an appropriate balance of residential and non-residential uses occur in a manner to support each other.

No more than 1,849 additional residential dwelling units shall be permitted within the SR7/441 TOC during the planning horizon of ~~2015~~ 2025. However, in the event that additional residential dwelling units are requested before the ~~2015~~ 2025 planning horizon, the City Commission will hear such request and determine if additional units are necessary to further the SR7/441 Corridor Master Plan. In no case, shall development proceed before the necessary concurrency requirements have been addressed.

A total of 15% of the residential units shall be provided as affordable housing. ~~Affordable housing shall be encouraged as bonus density consistent with Broward County Planning Council Administrative Rules Document, Article 8.~~ The City shall create a mechanism to ensure that affordable housing, required as part of this land use category shall remain affordable in the future. The intent of the affordable housing is to ensure that those affordable units are integrated into a development proposal and not easily identified by location or design within the overall community. The City will work with the CRA to develop programs to develop a land trust, streamlined permitting, programs to work with major employers and agencies to construct workforce housing units as part of the master redevelopment plan, and other programs and policies that will promote the affordability of housing units. The land development regulations will be developed in a manner that encourages new residential development within the TOC to be allowed on reduced lot sizes, reduced parking ratios, zero lot lines, clustering, and vertical integration of residential units with non-residential units.

Residential density shall be distributed along the corridor consistent with the SR7/441 Corridor Master Plan. Residential densities shall be provided for as follows:

<i>Location</i>	<i>Units</i>
North of Town Center	300 D.U.
Town Center	1,249 D.U.
South of Town Center	300 D.U.

Nothing in this policy shall limit the ability to address future redevelopment needs in the planning horizon post ~~2015~~ 2025 or to expand existing public water and wastewater facilities. Total residential and non-residential development may be limited by available water supply and wastewater treatment. ~~The amount of development permitted within the TOC has been calibrated to match existing water and wastewater capacities and reflects a projected capacity of the existing public water and wastewater facilities.~~ No more than 1,849 additional residential units shall be permitted unless it can be demonstrated that sufficient wastewater and water supply is available or necessary upgrades are incorporated into the Capital Improvements Program and Element.

**RE:** **Sanitary Sewer Analysis and Potable Water Analysis for the State Road 7  
Transit Oriented Corridor Land Use Plan Amendment Application**

I have reviewed items 1 through 4 of the sanitary sewer analysis for the referenced application. I have verified the plant and permit information shown and the current demand and committed flows are correct. The projected flows are realistic given the population projections provided to me, the current per capita flow, and the proposed future land uses.

I have also reviewed items 1 through 5 of the potable water analysis for the referenced application. I have verified the plant and permit information shown and the current demand and committed flows are correct. The projected flows are realistic given the proposed future land uses.

**Subject:** Margate Land Use Plan Amendment

Mr. Crouse - As you know, the Broward County Planning Council requires drainage service provider correspondence be included in Land Use Plan Amendment Applications to confirm the accuracy of the drainage related response in the Application. The attached drainage section for your review is within the City of Margate's SR 7 Transit Oriented Corridor. A location map is attached. This application, being prepared by the City of Margate, is to correct some mistakes in the "basket of rights" approved back in 2007 and won't create any new entitlements.

Let me know if you have questions. An email response that includes your email signature should suffice to meet the requirements.

Thanks,
