RE: Cost Estimate

Dear Ms. Gargin,

*This letter is in response to a request from you and or your company to provide a cost estimate for a waiver from the City of Margate in regards to undergrounding our facilities at 750 S State Rd 7 Margate 33068. I understand the estimate is for work that will not take place. AT&T normally doesn't provide estimates due to a very strict custom work order procedure (billing jobs). I understand the City is requiring this estimate in order for a waiver to be given. I will provide a general estimate however if this work does move forward. I will begin the billing process. I have reviewed our records and see we have aerial facilities in that area. This type of project would require placing, removing and cutting over potential working lines. A typical project of this nature work be greater than \$5,000 but less than \$20,000.*

*If you have any questions or concerns please contact me at 954-476-2901.*

Sincerely,

  
**Pamela Bryant**
