#### Re: Redeeming Lighthouse - Margate, Florida Parking Statement

Dear Mr. Biscette:

As requested, Danielsen Consulting Engineers, Inc. (DC Engineers, Inc.) has prepared this parking statement specific to the conversion of 1,327 square feet within the Royal Palm Court retail center from a FIT 5 fitness center to a sanctuary for use by the Redeeming Lighthouse of God Int'l Ministries. It is our understanding the project site is located at 7452 Royal Palm Boulevard within municipal limits of the City of Margate, Florida. Figure 1 shows the location of the overall project site.

The proposed conversion of 1,327 square feet within the Royal Palm Court retail center will not result in the material loss of parking spaces as all work is expected to remain interior to the subject store front. A survey of the overall property, included as Attachment A, shows the 23,680 square foot Royal Palm Court retail center currently has 108 total surface parking spaces of which five (5) spaces are designated as ADA accessible. A 'change of use' plans package specific to the proposed Redeeming Lighthouse is included as Attachment B.

#### Site Data

As all onsite uses are contained within one (1) building with a shared parking supply, from a trip generation and parking perspective, the site operates as one (1) retail property. With 23,680 square feet hosting a variety of tenants including restaurants, personal care providers and office space, the 108 surface parking spaces are shared throughout the day by employees and patrons alike.

#### **ITE Parking Analysis**

A parking analysis has been conducted in accordance with procedures and data included within the current edition of the Institute of Transportation Engineers (ITE) *Parking Generation Manual (5th Edition)*. This publication contains parking data, rates and formulae for a variety of land uses based upon research conducted by transportation professionals throughout the country. The applicable ITE land use for this analysis is Land Use Code (LUC) 820 - Shopping Center.

Utilizing parking generation data provided by ITE in LUC 820, a detailed parking analysis was completed to identify peak parking demand of the Royal Palm Court retail center by day of the week (i.e. Monday through Thursday, Friday, Saturday, and Sunday). Specifically, average peak parking generation rates were considered. The results of this analysis are shown in Table 1, attached. The parking analysis shows that the peak parking demand is projected to occur on a typical Saturday (around 1:00 PM) with 69 spaces occupied. As a result, 35 parking spaces would remain unoccupied and available.

It is important to note that the 50-seat worship center proposed is expected to be active on Sundays (9:00 AM to 5:00 PM), Wednesdays (8:00 PM to 10:30 PM) and Fridays (7:30 PM to 10:00 PM), exclusively.

### **DC** ENGINEERS, INC.

As required by the City of Margate, a Master Parking Plan has been prepared by SunTech Engineering, Inc. and is included as Attachment C. The Master Parking Plan shows a loss of four (4) onsite parking spaces due to the inclusion of end islands in two (2) locations. Regardless, even with 104 parking spaces onsite (99 regular and five (5) ADA accessible spaces) the peak parking demand realized through application of ITE rates can be comfortably accommodated.

#### **ADA Parking**

The survey included as Attachment A shows 108 onsite parking spaces are currently in place including five (5) ADA accessible spaces. Similarly, the Master Parking Plan included as Attachment C shows 104 onsite parking spaces including five (5) ADA accessible spaces. According to applicable Florida Statutes, five (5) ADA accessible parking spaces are appropriate for the Royal Palm Court retail center.

#### Loading Zones

An off-street loading area is currently provided along the south side of the retail center in compliance with Article XXXIII Section 33.9 of the Code of Ordinances specific to the City of Margate which states, 'for the purposes of this section, an off-street loading space shall be an area at grade level at least twelve (12) feet wide by forty-five (45) feet long with fourteen and a half (14½) foot vertical clearance. Each off-street loading space shall be directly accessible from a street or alley without crossing or entering any other required off-street loading space, and arranged for convenient and safe ingress and egress by motor truck and/or trailer combination. Reference both the survey in Attachment A and the Master Parking Plan in Attachment C.

Of course, please do not hesitate to contact me directly with any questions you may have.

Sincerely,

DC ENGINEERS, INC.

#### **Building Codes And Zoning Requirements**

At the time of creation, these plans were designed to meet the requirements of a nationally recognized model building code in effect where these plans were produced. Because of the great differences in geography and climate throughout the United States each state, county and municipality has its own building codes, zone requirements, ordinances and building regulations. These plans may need to be modified and additional drawings and details may need to be added to comply with your local conditions, requirements, and a wide range of other matters. All of our plans can be adapted to the local building codes and requirements. It is the responsibility of the purchaser and/or builder of each plan to see that the structure is built in strict compliance with the governing municipal codes (city, county, state and federal). In addition to the building plans that you order, you will also need a site plan that shows where the house is going to be located on the lot. There are some areas of the country that have very strict engineering codes. If you are building in this type of area, it is possible that you will need to hire a local engineer to analyze the house and provide additional drawings and calculations that may be required by your building department. Notice Duty Of Cooperation

Our firm assumes no liability for any home constructed from these plans. Only qualified Designers, Architects, Contractors or Structural Engineers should attempt to *modify* any portion of these plans. It is the sole responsibility of the purchaser to obtain any and all structural analysis, engineering and specifications that are required where the structure is to be built. Written dimensions on these drawings should have precedence over scaled dimensions; the contractor shall verify and be responsible for all dimensions and conditions on the job.

#### Architectural And Engineering Seals

Some cities and states are now requiring that a licensed architect or engineer review and "seal" these plans, or officially approve them prior to construction. In addition, you may need to obtain permits or inspections from your local governments before and in the course of construction. Prior to using these plans, we strongly advise that you consult a licensed architect or engineer, as well as consult with your local building official before applying for any permit or before starting any construction related to these plans. We authorize the use of these plans on the express condition that you strictly comply with all local building codes, zoning requirements and other applicable laws, regulations, ordinances and requirements. License Agreement

By the purchase of our plans, customers are granted a limited license to use the plans for the construction of only **one** home. It is strictly prohibited to reproduce, sell, modify, trace, redraw or reuse the plans or designs without the written permission from the copyright owner. This limited license also applies to all other reproducible media. All orders, once placed, are final. No refunds or exchanges will be granted. Terms And Conditions

It is not permitted to copy any part of our original designs or reproduce them in any way or by any means, unless you have purchased reproducible plans, which clearly indicate your right to copy or duplicate these plans. We do not authorize them to be sold to another person or third party. We only authorize the use of your chosen design as an aid in the construction of one single-family home. You may not use this design or these plans to build a second or multiple dwellings without purchasing another set of plans or paying additional design fees.

#### Terms And Conditions - Ownership and Use of Documents

The **Architect** shall have the right to include representations of the Design of Project, including, but not limited to, photographs, plans, drawings, artistic renderings, digital images, and/or videotape, and/or such other similar demonstrative images of the exterior and interior of the subject project, among the Architect's promotional, marketing, advertising, and/or professional materials (collectively, "marketing materials"). The Architect's marketing materials shall not include any image and/or description of the Client's confidential or proprietary information and/or property.

The Architect shall be permitted to post an appropriate job site sign, which sign may include the Architect's name, business address, business telephone number, and/or such other similar business related information within the boundary of the subject property, beginning with the issuance of the permit through the commencement date of issuance of a certificate of occupancy.
